A0: 920 x 1280mm
B0: 1080 x 1580mm
1200 x 1800mm
Custom Sizes

The HD1 is a Harsh Duty Outdoor and Indoor Lockable Poster Frame. It is Australian Made with a very high build quality to give a long reliable service life and endure applications with high levels of vandalism and demanding natural environments. They are very versatile and have a lot of scope for custom made requirements to fulfill all applications and budgets.

The frame is a specially designed marine grade structural aluminium extrusion. The standard finish is exterior grade anodised satin or powder coated black. The optional upgrade of selected powder coated colours is also available.

Standard is Stainless Steel hinges attached on the longer side for the swing door which is foam tape sealed to further resist bugs, dirt and water ingress. Standard is two key (alike) locks mounted on the front to secure the door, or on the side for the optional rear opening door. Included as standard are auto gas lift door stays (as a safety requirement) or there is the optional saving of manual stays only for portrait orientation mounted notice boards with side opening doors.

The display window can be made from 2 different material options:

3mm thick Acrylic which has good natural resistance to cleaning blemishes and haziness from graffiti removal but has poor resistance to concentrated high impact shattering and burning. If this type of vandalism or abuse is likely to be prevalent then request **3mm Polycarbonate** that offers good resistance to concentrated high impact shattering and burning, but has poor resistance to cleaning blemishes and haziness from graffiti removal. Hence the optional upgrade of extra protection offered in an anti-graffiti film applied to the window to offset this disadvantage. **Note:** on the very, very rare occasion this film could blister and we do not offer a warranty against this.

Standard **backing material** is white colourbond to accept the supplied magnetic poster holders. The display area can be back lit or edge lit illuminated if required.

These poster cases are also available with a build in 'Poster Up' pulley system to install higher up posters safely and easily without step ladders.
