

Pylon Wayfinding Sign

The Pylon Wayfinding Sign is a modular convex sign and display system that has been engineered to be highly versatile. This sign and display system can be easily upgraded with new information, be it new mapping, additional directions and places of interest, or new precinct branding.

This wayfinding sign system is made up of individual modules. This enables changes to be made to separate information panels as required. Costs associated with changing information or replacing damaged panels can be significantly reduced with this wayfinding signage system. With conventional signage, the entire sign panel component may require replacement if information is updated, or the complete sign structure may require replacement if it is damaged.

Manufactured using high quality durable materials and finishes, the Pylon Wayfinding Sign is suitable for both indoor and outdoor environments. They are constructed from marine grade aluminium, offering excellent protection in coastal environments.

An internal galvanised steel post provides core inner strength and also forms part of the footing to create a robust, vandal resistant construction. Industrial anti-graffiti finishes and coatings can be specified to ensure that the signage is kept looking at its optimum throughout its long service life.

Product Features

- Modular system offering reduced maintenance costs
- Interchangeable panels for hassle free upgrades
- Screen printed or digitally printed graphics
- Vandal resistant design and construction
- Information Displays incorporated into modules

Dimensions

- 1200mm
- 850mm
- 600mm
- 440mm
- 310mm
- 220mm

Materials and Finishes

- Marine grade aluminium extrusion
- Galvanised steel structural post
- Aluminium sign panels
- Polycarbonate display panels
- Powder coated to standard colour range
- Anodized surface finishes available
- Optional anti-graffiti coatings
